THE JOY BLACKBERRY.

BRINGS JOY TO ALL WHO GROW, SELL OR EAT IT.

Unites Superlative Quality, Ironclad Hardiness and Great Productiveness.

"It's immense!" That's what several persons have said when seeing the Joy Blackberry in bearing for the first time. It is an appropriate exclamation; for the berries of Joy are not only of very large size but this blackberry is truly immense in every way—in enormous yield, in vigorous growth and heavy leafage, in beauty of color and form, in quality. The season just past it was finer and better than ever. In fact it has proved to be so far superior to all other blackberries that we would not accept as a gift plants of any other variety if we could obtain plants of the Joy at \$25.00 a hundred—much less at the price at which they are now offered.

It may be briefly described as follows: The canes are of stocky, vigorous habit—so stout and strong it needs no staking—with abundant large five fingered leafage; yields very heavily every year and all the canes are loaded with fruit; (we have never known any variety, either Blackberry or Raspberry, with such an inherent propensity to bear fruit as the Joy Blackberry).

The canes are of ironclad hardihood; never having been injured by cold.

It has endured a temperature of twenty-four degrees below zero unharmed, and is immune to "Orange Rust." The past year, in order to test its resistance to Orange Rust, we had it growing in adjacent rows to a blackberry, the canes of which were badly infested with this scourge, and not a trace of Orange Rust appeared upon the Joy—an added joy to us.

The berries are large and almost as thick through as they are long, and are coal black. It is not an early variety but ripens in midseason—with Ward, Blowers and Kittatinny. It has been given a thorough test for six years and has not developed a defect, and we believe it to be the blackberry of the future, destined to become as popular among blackberries as the Gandy has been among strawberries or the Cuthbert and St. Regis are among raspberries—all of which were sent out into the world from the Monmouth Nursery.

The chairman of the special committee on new fruits of the New Jersey State Horticultural Society in a recent report of the society said: "The Joy Blackberry has been carefully watched, and I am of the opinion that it is the best variety to plant that is listed to-day. The plant is a strong grower and a heavy cropper of large black fruit; leaves do not rust and the berries stay black after picking. Planted alongside of Ward and several other varieties, it was the only one entirely free from rust or leaf blight."

An expert, writing in *Garden Magazine*, says; "Joy Blackberry has been planted in the Eastern states for a few years and has the reputation as being a great bearer. The plants are very hardy . . . and the fruit is meaty and good."

Mr. Leonard Barrou, editor of the *Garden Magazine*, writes: "The Joy Blackberry I have already known and appreciated. It has fruited here at Garden City and is the best blackberry we have on the place."

Sucker plants, dozen, 50c; 100, \$2.00; 1000, \$15.00.

Root cutting plants, dozen, 60c; 100, \$2.50; 1000, \$20.00.

Transplanted plants, dozen, 75c; 100, \$3.00; 1000, \$25.00.

J. T. LOVETT, Inc., Little Silver, N. J.

CACO (CATAWBA CONCORD) GRAPE

THE most delicious of all grapes—whether hardy or exotic. A perfectly hardy grape that has been pronounced by America's most expert grower of Hot House grapes to equal, in high quality and melting texture, the finest varieties grown under glass. When one considers the price of the greenhouse product and realizes that the wonderful Caco can be grown in the back yard almost without attention, the force of the above statement is apparent.

In appearance, the most beautiful of hardy grapes; berry large, wine red with abundant bloom. Bunch of good size, compact and of good form. Ripens in advance of Concord; so rich in sugar it is excellent in flavor two weeks in advance of being fully ripe. Vine a very strong vigorous grower, healthy and prolific. The fruit sells in open market, by the crate, at double the price of any other variety.

Highly commended by prominent fruit growers throughout the country. We cannot recommend the Caco too highly.

Caco will yield vineyardists dollars to dimes of any other variety. We will give special rates for vineyard planting.

WHAT THE EXPERTS SAY:

"I predict, when this variety gets better known, it will hold a foremost position among hardy grapes. . . . John T. Lovett may well be congratulated in producing such a noble variety."

WILLIAM TURNER.

The Caco grape I bought of you and planted in April 1912 is doing finely. It is a rapid grower, as much so as Concord. It had a few bunches of grapes in 1913 and was loaded with splendid bunches of grapes in 1914. Bunches large and compact, berries larger than Concord, quality best in a lot of over 50 varieties I am growing.

W. A. KREGEL.

We had a fine lot of Caco grapes which I believe is the finest grape grown. M. W. PENROD.

"I consider it a valuable acquisition to our limited list of first-class table grapes and the best market variety for vineyardists." E. S. BLACK.

"I believe it is, in all-round good qualities, the best grape I have ever eaten."

JOHN LEWIS CHILDS.

"I want to congratulate you on your Caco Grape. . . . The flavor is *simply delicious*—the best I have ever eaten. I intend to plant it."

PETER DUFF.

"The most conspicuous new grape is Caco, which I know to be deliciously sweet, high flavored and melting texture.—*Garden Magazine*."

Awarded a Medal by the American Institute of New York.

One year vines, each, 20c; dozen, \$2.00; 100, \$12.00.

Two year vines, each, 30c; dozen, \$3.00; 100, \$18.00.

Fruiting vines, each, 50c.; dozen, \$5.00.

J. T. LOVETT, Inc., Little Silver, N. J.
